

## 4 Cell 18650 Lithium ion Battery Holder

### Description:

This 18650 Lithium ion Battery Holder is a high-quality Lithium battery holder that can hold four 18650 Lithium batteries. It's a space-saving battery holder with built-in PCB protective circuits for securing rechargeable 18650 Lithium-Ion Cells with increased energy density and reduced weight.

This Lithium ion [Battery Holder](#) is designed for 3.7-volt, high-energy, low-weight mobile electronics, industrial, and telecommunications applications that require circuit protection to prevent battery damage.

### Specifications:

Colour	Black
Operating Temp	-60°F to +290°F (-50°C to +145°C)
Wire Length	145mm
Dimensions	80x75x20mm
Weight	3

### Applications:

- Computer memory, power backup systems
- Digital readers
- Laptop and touchpad computers
- PLC and industrial controls

### Package Includes:

- 1 x 4 Cell 18650 Lithium Battery Holder
