

U.FL to SMA TS-U.FL-SMA-F-25cm wire

Description:

This is an interface cable that connects u.FL connector to an SMA Female Connector. Use this cable to connect the tiny u.FL connector on a PCB to an antenna with an SMA connector. The SMA Female connector in this cable can be mounted onto a panel. Use it to connect to GPS and cellular antennas to a U.FL connector.

Features:

- 25cm length for moderate connections.
- IPEX1 to SMA Female connectors.
- Suitable for antennas and RF devices.

U.FL to SMA TS-U.FL-SMA-F-25cm wire

- 11mm RG178 cable maintains signal quality.
- Durable construction ensures reliability.
- Compatible with specific frequencies.
- Low signal loss, minimal interference.

Specifications:

| Item Type | Connector Cable |
|-----------------------|-----------------|
| Cable Type | RG178 |
| Cable Length (cm) | 25 |
| Connector Length (mm) | 11 |
