

# U.FL to SMA TS-U.FL-SMA-F-20cm wire

## Description:

This is an interface cable that connects u.FL connector to an SMA Female Connector. Use this cable to connect the tiny u.FL connector on a PCB to an antenna with an SMA connector. The SMA Female connector in this cable can be mounted onto a panel. Use it to connect to GPS and cellular antennas to a U.FL connector.

## Features:

- 20cm length for moderate connections.
- IPEX1 to SMA Female connectors.
- Suitable for antennas and RF devices.

## U.FL to SMA TS-U.FL-SMA-F-20cm wire

---

- 11mm RG178 cable maintains signal quality.
- Durable construction ensures reliability.
- Compatible with specific frequencies.
- Low signal loss, minimal interference.

### Specifications:

Item Type	Connector Cable
Cable Type	RG178
Cable Length (cm)	20
Connector Length (mm)	11
