

SEN-PPI150: PP Water Float Sensor

Plastic PP material, switching signal, apply to water dispenser, humidifier, water air conditioning, air conditioning fan etc.

Technical parameter:

- Used medium: Water or liquid that has no damage to the float, 0- 60 Deg C
- Voltage/electric current: DC24V, $\leq 0.5A$
- Custom-made: Wire harness specification, dimension of float, warning point, switching power

Product Details:

Fix Screw	M 10
Switching Response Time	0.2 ms
Switching Power	10 W, normally open, (NO), double alarm point
Switching Life	10^8 times
Rated Voltage	Less Than DC24V (for high voltage use, access intermediate relay)
Insulation Resistor	10^8 Ohm
Installation Method	Vertical entry 150 mm
Floating Diameter	24 mm
