

U.FL to SMA TS-U.FL-SMA-F-10cm wire

Description:

This is an interface cable that connects u.FI connector to an SMA Female Connector. Use this cable to connect the tiny u.FI connector on a PCB to an antenna with an SMA connector. The SMA Female connector in this cable can be mounted onto a panel. Use it to connect to GPS and cellular antennas to a U.FL connector.

Features:

- 10cm length for moderate connections.
- IPEX1 to SMA Female connectors.
- Suitable for antennas and RF devices.
- 11mm RG178 cable maintains signal quality.
- Durable construction ensures reliability.

U.FL to SMA TS-U.FL-SMA-F-10cm wire

- Compatible with specific frequencies.
- Low signal loss, minimal interference.

Specifications:

Item Type	Connector Cable
Cable Type	RG178
Cable Length (cm)	10
Connector Length (mm)	11
